

# PURI-50

PORTABLE AIR PURIFIER

- BREATHE CLEAN AND HEALTHY AIR
- THREE FILTRATION STAGES
- ULTRAVIOLET UVC ANTI-BACTERIAL LED
- DESIGNED FOR HOMES AND OFFICES

360° drum type filter  
with three filtration stages

HEPA

Indoor air purifiers represent a major breakthrough in terms of providing healthier environments. They are effective at removing foul odours as well as eliminating dust, mites and a multitude of bacteria and microorganisms that are harmful to health. They also help relieve the symptoms respiratory diseases such as asthma and all types of allergies.

Nowadays, having an efficient and silent air purifier at home as well as at the office and in frequented public spaces is essential to ensure we are breathing a quality air that is free of organisms that are harmful to health.

## PURI-50 MODEL

This system incorporates a digital panel that, in automatic mode, continuously monitors the air quality and the concentration of fine particles in the air.

|                                     |                    |
|-------------------------------------|--------------------|
| Model                               | PURI-50            |
| Maximum effective working area (m²) | 45-50              |
| Air flow rate (m³/h)                | 400                |
| Noise level (dB)                    | <56                |
| Supply voltage (V)                  | 100-240 V 50/60 Hz |
| Power consumption (W)               | 50                 |
| Weight (kg)                         | 4.8                |
| Size — height x length x width (mm) | 562 x 270 x 303    |
| Timer (h):                          | 2/4/8              |

Its cylindrical design allows air to be drawn in through a large surface area, increasing its efficiency and filtration performance.

Excellent filtration power thanks to a drum type filter with three stages of filtration. The first stage captures large  $PM_{10}$  particles such as dust, fibres and lint. The second stage captures particles between  $PM_{0.3}$  and  $PM_{2.5}$  in size, such as pollen and spores. The third stage eliminates odours generated by tobacco, cooking and pets.

### Technical characteristics

- Built using the high performance E.C. Technology motor
- HEPA type filters with a filtration efficiency of 99.99%
- Digital control panel
- Air quality control sensor
- Colour indicator lamp indicates air quality
- Automatic, manual and timer modes
- Anti-bacteria and virus stage with UVC ultraviolet led
- Different filtration stages
  - Large  $PM_{10}$  particles filter
  - HEPA fine particles filter
  - Volatile and foul odour organic compound filter
