Time switch CBT

Electronic time switch

CB is a new range of regulators in an appealing and modern design. The design makes them appropriate for all environments and they are easily positioned.

CBT is an electronic timer where the setting is activated via a button on the front. CBT can be set on 30 minutes to 4 hours or 4 to 24 hours respectively.

Via internal dip switches it is possible to have a maximum setting of 24 hours instead of 4 hours. The maximum time can also be limited to for example 30 minutes if desired. Protection class IP44.

- Appealing and modern design
- Easy timer setting on the front
- Flexible settings. The setting can be limited or extended compared to standard via internal dip switches
- Alternating volt free contact, max 16A
